## Darnell Consulting Inc. The Leadership Journey

**New Year greetings!** We wish all of you great success in your endeavours in 2010.

In the past year Darnell Consulting Inc. has had a gratifying and growing relationship with our Leadership Journey. Now we are looking forward to another successful year that will concentrate on Organizational Change as well as Leadership.

During our planning day in December, we were amazed as we went through our client list, to realize that some of our biggest accomplishments have been with clients in organizational planning and change. Then again it does fit in really well with the Leadership Journey. So to all of you, jump into 2010, and if you get bogged down give us a call. This is where this company is at its best!

We are also very pleased to share some client feedback. This wonderful lady says *"Thank you for sharing the Nora Denzel video link. Although I have, in the past year, been able to practically apply many positive personal growth lessons, Nora Denzel's video is directly responsible for me being seriously considered for the new position of Vice-President of Operations. I will now be in a position to have a real positive influence at my company and am very excited about the potential. Working with you both has truly been a blessing."* Lana T.M.

*A loyal customer had this to say about the leadership program: "I feel that now I am working with managers who have become leaders. And now they are working with staff who are becoming leaders in their own right."* Cheryl S.
